**DETAILED ACTION**

***Specification***

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the terms “particular type” of message, pseudo-random number calculation of wake-up, and on-line data entry.
  
2. The disclosure is objected to because of the following informalities: there are several appendices referenced, however there are no appendices filed..

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
  
4. Claims 70, 71, 74,108,109,113 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claims 70, 71, 74,108,109,113 the calculation for wake up based on a pseudo-random number this is not defined or detailed in the specification.

***Allowable Subject Matter***

5. Claims 40-42 and 46-51 are allowed for the reasons presented in applicant's previous response.
6. Claims 55-69,72,73,75-107,110-112 are allowed for the reasons presented in applicant's response.
- 7.

### **Response to Amendment**

8. Applicant's arguments with respect to claims 70, 71, 74,108,109,113 have been considered but are not persuasive.
9. As noted in the telephone interview, terminology shold be consistent between the claims and the supporting specification.
